## **COMPANY DESCRIPTION:**

Featuring a 3-stage rocker pop with a continuous rocker flow on the water, the PS3 will help carry you across the wake and into the flats. Its a smooth and forgiving ride that will help take your riding to the next level. The 3-stage, hybrid rocker has a straighter curve through the center for consistent edging and speed into wake. It has an exaggerated kink out the tips for smooth transitions into the tail section for increased trajectory off the wakes. The PS3 also features an exaggerated variable edge rail with a D-I-S-C (double inside single concave) hull through the center of the board. The tip exiting slots channel the water away in the proper direction. They help to generate speed while keeping you locked in on approach to the wake. As the warped molded in fins grow towards the tail they get sharper and warp inward. The end result is a loose feel when in neutral that generates relentless hold as you edge.
